CONTRAC®
RAT & MOUSE BAIT READY TO USE PLACE PACS

MEAL

KILLS RATS, MICE & MEADOW VOLES*

Kills Warfarin Resistant Norway Rats

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

ACTIVE INGREDIENT:
Bromadiolone (CAS #28772-56-7): ............... 0.005%
OTHER INGREDIENTS†: ......................... 99.995%
†Contains Denatonium Benzoate

TOTAL: 100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panels for First Aid and additional precautionary statements.

NET WT: 16.3 lbs (7.4 kg)
CONTRAC® RAT & MOUSE BAIT READY TO USE PLACE PACS

KILLS RATS, MICE & MEADOW VOLES*

Kills Warfarin Resistant Norway Rats

Norway rats, roof rats and house mice may consume a lethal dose in one night’s feeding with first dead incidents appearing four or five days after feeding begins.

ACTIVE INGREDIENT: Bromadiolone (CAS #: 28772-56-7): 0.005%

OTHER INGREDIENTS*: .................................................. 99.995%

TOTAL: 100.000%

NOTE TO PHYSICIAN

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

IMPORTANT:

Do not expose children, pets, or non-target animals to rodenticides. To help prevent accidents:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations, these stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations, these stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait.
3. Do not store or place this product in an area where food, feed, foodstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use this product in sewers.

NOTE TO VETERINARIAN

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), glime Vitamin K1, if needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

TREATMENT FOR PET POISONING

If animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), glime Vitamin K1, if needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

CAUTION:

Do not contaminate water, food or feed by storage or disposal. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use this product in sewers.
