InTice™ perimeter bait

Keeps Roaches, Crickets, Mole Crickets, Sowbugs, Pillbugs, Earwigs, Silverfish, Millipedes, Snails, Slugs and Ants*

*Except Pharaoh Ants, Fire Ants, Harvester Ants

For Indoor, Outdoor, & Turf Uses
Mold & Moisture Resistant
Ready-to-Use Bait

Active Ingredient: Orthoboric Acid ....10%
Other Ingredients: .................................90%
Total: ....................................................100%

Directions for Use

Treats up to 1000 sq ft per Pound

In attics, be sure to get bait near the eaves and vent pipes as around any pipes or potential access points between the attic and the main structure. Ants should have proper ventilation to ensure that no food odor from the bait seeps into the living area, particularly in hot weather. If in doubt, apply the product in a manner such that it can be easily removed.

When treating cabinets, if there is no gap between the cabinets and the kickplate, then small holes can be drilled to access the voids. Escutcheon plates around pipes can also be pulled back to allow access to voids.

The bottom drawers in kitchen and bathroom cabinets can be removed and bait dusted into drawer wells. Do not leave any bait exposed when drawers are replaced.

Electrical switch plate covers can be removed to allow access to voids, but bait must not be applied directly in electrical boxes.

If there are cracks between baseboards, cabinets, doorframes, hinges, counters or trim, and walls, these cracks can be lightly dusted with bait. If practical, these areas can be sealed once insect problems have been eliminated, to help prevent future problems.

Insects need moisture, so kitchen and bath areas and areas immediately surrounding them, and any other damp areas should be carefully inspected and treated if necessary. As a separate matter from the use of this product, it is advisable to fix any leaks to minimize structural damage and odors, and to prevent potential chronic insect problems.

To help prevent insect problems from developing in homes and buildings, a preventative program is recommended. Once per quarter, apply bait in a band around the outside building perimeter. Once per year, apply bait in attics and crawlspaces. Follow Indoor/Outdoor Application Directions above.

Storage and Disposal

For 10 lb and 40 lb containers:

Storage: Store in a dry place. Do not store where children or animals may gain access.

Disposal: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP which is managed as a public-private partnership.

Or, for 1 lb and 4 lb containers:

This storage/applicator container may be refilled by the end-user of the product. Refill only with InTice 10 Perimeter Bait.

Disposal: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP which is managed as a public-private partnership.

Environmental Hazards: Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwaters or rinsates.

EPA Reg. No.: 73079-6
EPA Est. No.: 73079-MO-1
Net Contents: 1, 4, 10, 20 lbs

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions: In food areas of restaurants, residential, health care, educational, day care, agricultural buildings, animal rearing and handling establishments, food handling and food processing establishments, this product may only be applied as a crack and crevice treatment. Any product remaining outside of cracks and crevices must be cleaned up and removed.

Use Sites: In and around residential, multi-family, commercial, industrial, municipal, institutional, research, recreational, health care, educational, daycare, hospitality and agricultural buildings and other man-made structures, garages, home greenhouses, landscape beds, transport vehicles, sewers, animal rearing and handling establishments and food handling and food processing establishments. Turf sites include lawns, ornamental turf, parks, playing fields, right-of-ways, and golf courses. Turf use not allowed in the State of California.

Outdoor Application
Apply bait at a rate of 1 lb (about 3 cups) per 1000 square feet. Apply in a band from top to four feet wide around the perimeter of buildings. Also apply around exterior light fixtures and along the edges of sidewalks, patios and driveways and under decks. Apply bait early in the season in areas likely to be infested, such as mulch beds, flower beds, fruit and vegetable gardens, compost heaps, wood piles, and around trees, stumps and trash areas. The bait may also be sprinkled in and around rodent bait stations to control insects that harbor in these stations. When treating for ant mounds and sparkles along foraging trails. For ants, pay particular attention to harborage areas and apply bait around trees and stumps, in tree cavities, in and around firewood piles, around landscaping stones and in mulch beds. Bait may also be applied in insect bait stations. Reapply bait after one week if infestation is still present. Or, for 1 lb and 4 lb containers:

For Carpenter Ants: Apply bait at a rate of 14 oz by weight (3 cups) per 100 sq ft. Apply in a band not to exceed one foot in width around trees and stumps, firewood piles, structure foundations and other potential nest sites. The bait may also be applied in tree cavities and firewood piles, and under porches and decks. Do not apply more than 2 lbs per 1000 sq ft of total area, or 10 lbs per acre.

For Sewer Application: Apply bait along ledges inside sewers and around manhole covers.

For Indoor Application
Apply bait only in areas inaccessible to children and pets, or in tamper-resistant bait stations. Apply bait at a rate of 1 oz (2/3 cup) per 100 square feet. Using a hand shaker or duster, apply bait in attics, crawl spaces, trash closets, utility closets, dropped ceilings, on dirt or gravel cellar floors, under and behind appliances, and around feedstuffs, feeders, and wall feeders. Never apply bait directly to a surface that is left visible after treatment must be swept into cracks and crevices or removed.

Disposal: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP which is managed as a public-private partnership.

Or, for 1 lb and 4 lb containers:
