

Gentrol® Aerosol

Supplemental Labeling

For Use to Control Bedbug Populations (FOR PROFESSIONAL USE ONLY)

EPA Reg. No. 2724-484

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Important

Before using this product, read and carefully observe all applicable directions, restrictions, and Precautionary Statements on the GENTROL® AEROSOL EPA-registered label.

General Information

GENTROL AEROSOL contains GENTROL® Insect Growth Regulator (IGR). The IGR disrupts the normal development of bedbugs. Bedbugs exposed to GENTROL AEROSOL will become adults incapable of reproducing, thus ending the cycle of an infestation. Use GENTROL AEROSOL in areas such as, but not limited to: apartment buildings, hospitals, residential homes, hotels/motels, nursing homes, and marine vessels.

Spot or Crack and Crevice Applications

Apply GENTROL AEROSOL as a crack and crevice application using the supplied extension tube. Apply directly to areas such as: wall voids, pipe chases, crevices, and false ceilings. Apply spot treatments to areas such as: storage areas, closets, furniture and beds. To treat bedbugs, apply to harborage points mentioned above; in addition, under beds, bottom side of box springs (do not treat linens and mattresses), under and behind night stands, to points where carpet and wall meet, cracks in cove base, molding, and other areas where bedbugs harborage.

This labeling must be in the possession of the user at the time of pesticide application.
